Investment Strategy

Buy-and-hold portfolio holding stocks with *Estimated Long Term Growth Rates* of 15% or greater, most with reasonable valuations (P/E ratios).

Portfolio Management

We continuously search the stock market for what we believe are the top 100 stocks in the market today.

Then we do fundamental re-

search on 75-100 of these top stocks to create *Research Reports* with proprietary charts, then estimate a *Fair Value* for what each stock is worth. David Sharek then selects stocks for the main portfolio utilizing this research.

You Own the Stocks

David manages each account individually. He makes the trades for you. This isn't a mutual fund — you own the stocks. Your account is in your name and is not commingled with other clients. Clients can view accounts online, or via an app, at anytime.

Portfolio Manager

David started his career as a Financial Consultant at A.G. Edwards & Sons in 1999, investing clients in mutual funds, stocks, bonds & annuities.

The 2000 stock market crash crushed his investors and left David leery of Wall Street & mutual funds. Sharek became a student of stocks, and discovered the best stocks had the highest profit growth.

In 2002 David accepted a position of Vice President—Investments at Wunderlich Securities and developed his Growth Stock Portfolio.

Sharek's Growth Portfolio averaged a return of 24% his first five years as a portfolio manager (2003-2007), more than double the market's (S&P 500) average of 11%.

In 2008 David Sharek founded Sharek's Stock Portfolios. But another stock market crash took the Growth Portfolio down 58% that year. Still, by 2013 client accounts hit new highs.

Today, David continues to manage portfolios on a fee basis from his offices in Midtown Manhattan. He also runs **The School of Hard Stocks** stock education website.

2020 was a career year for David as his Growth Portfolio jumped 106%, with double-digit returns (+10% or more) in 6 of the 12 months.

Since inception, Sharek's Growth Portfolio has made investors 17% a year after fees, compared to 11% for the S&P 500 (2003-2021).

He's posted five years of +40% returns in his 18 year career as a portfolio manager.
